## Explanatory Notes on Foreign Trade Statistics

**Definition:** foreign trade statistics is about observing and counting commodity movement with countries including materials produced locally or RE-Exported or imported, during a specific period of time.

### **I Data Sources:**

#### 1-Customs Authority:

The Foreign trade statistics mainly depend on the customs declaration forms received by CSO staff members based at the customs ports and entry points.

#### 2- Ministry of Oil and Mineral Rescuers:

- Exports of crude Oil are directly obtained from the Ministry of Oil and Menial Resources through monthly forms filled in with both the government's and Oil companies' exports shares.

This is because of the unavailability of customs declaration forms on Oil export.

The data received from the Ministry includes monthly exported quantities of Oil in tons, barrels, value in US dollars, and the country to which the Oil is exported.

Transfer of the value from US dollars to Yemeni Rials I done by using the monthly market average exchange rate of the dollar issued by the Central Bank of Yemen.

### **II Methodology and Terminology:**

#### 1- The import Trade:

This includes all imported goods and commodities for consumption inside the country or those subject to extemporary import.

#### 2-The export trade:

It also includes re-exported goods and commodities of foreign origin, which either have been produced and manufactured in Yemen. It also includes re-exported goods and commodities of foreign origin which either have been exempted from customs duties or their duties paid.

4- country of Origin Country of origin is the country in which the goods/ commodities are produced or manufactured as related to animal and agricultural products. It is also the country where the final production / manufactured phase of products takes place or the country from where the goods/ commodities are brought or imported.

#### 5- Country of Export:

it is the country to which the goods/ commodities are exported declaration and date of export.

#### 6- commodity Valuation:

A: The value of all imports is calculated on a (CIF) basis, which is the value of the commodity in Yemeni Rials at port of origin plus transportation, insurance, and all other expenses. Customs duties are excluded from the commodity value.
